

NFPA 13, 2025 Edition

Installation of Sprinkler Systems

Expand your skills and expertise in understanding and applying sprinkler system installation requirements with real-time instructor-led training.

Gain a general understanding of the requirements around designing and installing fire sprinkler systems found within NFPA 13, Standard for the Installation of Sprinkler Systems, with live virtual training from the expert source.

Developed by NFPA code experts, the course helps ensure engineers, designers, installers, and anyone else who works with sprinkler systems understand the basic requirements of designing, installing, and operating a fire sprinkler system.

Enhance your understanding of this industry benchmark, addressing the design and installation of automatic fire sprinkler systems to help prevent fire deaths and property loss.

The 2025 edition of NFPA 13, Standard for the Installation of Sprinkler Systems Live Virtual Training, features the fundamentals of NFPA 13 updated to reflect the 2025 edition of the standard. Included with all the fundamentals are updates to the sloped ceiling criteria protecting storage arrangements, vacuum systems used to inhibit corrosion in dry and pre-action systems, the newest seismic bracing design requirements, and the latest requirements for supplemental sprinklers

Course content covers the ability to:

- » Navigate NFPA 13, *Standard for the Installation of Sprinkler Systems*, and identify the scope and purpose of the standard
- » Identify, locate, and apply installation criteria for fire sprinkler components
- » Determine fire sprinkler location requirements
- » Explain the requirements for water supplies and underground piping
- » Determine the appropriate fire sprinkler system type for a given hazard
- » Apply installation requirements for sprinkler systems and apply design approaches and calculations

Recommended Audience

Anyone responsible for ensuring water-based fire suppression systems work as intended in an emergency including engineers, plan reviewers, designers, installers, inspectors, manufacturers, insurers, consultants, and project managers
